Parent Company Only Financial Statements

Table Of Contents

Independent Auditors' Report

To E-LEAD Electronic Co., Ltd.

Opinion

We have audited the accompanying parent company only balance sheets of E-LEAD Electronic Co., Ltd. (the "Company") as of 31 December 2022 and 2021, and the related parent company only statements of comprehensive income, changes in equity and cash flows for the years ended 31 December 2022 and 2021, and notes to the parent company only financial statements, including the summary of significant accounting policies (together "the parent company only financial statements").

In our opinion, the parent company only financial statements referred to above present fairly, in all material respects, the financial position of the Company as of 31 December 2022 and 2021, and its financial performance and cash flows for the years ended 31 December 2022 and 2021, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China; Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements* section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. Based on our audits and the reports of other auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of 2022 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Allowance for losses on accounts receivable

As of 31 December 2022, the carrying amounts of accounts receivable and allowance for losses were NT$796,786 thousand and NT$488 thousand, respectively, and the net accounts receivable accounted for 24% of total assets, which was significant to the Company. As the allowance for losses is measured by the expected amount of credit losses over the life of the asset, the assumptions used in the measurement involve significant management judgement. We therefore determined this a key audit matter.

Our audit procedures include, but are not limited to, obtaining an understanding of, and testing the effectiveness of, the internal control system established by management over the collection of accounts receivable; Analyzing changes in accounts receivable and changes in turnover rates over the period and testing the collection of accounts receivable after the period to assess recoverability; Review the breakdown of accounts receivable at the end of the period and recalculate the reasonableness of the allowance for losses on accounts receivable based on the classification of individual credit groups and the expected loss rate as assessed by management. We have also considered the appropriateness of the disclosure of accounts receivable in Notes 5 and 6 to the parent only financial statements

Evaluation of allowance for losses on decline in value of inventories and obsolescence of inventories

As of 31 December 2022, the net inventory of the Company was NT$214,347 thousand, representing 7% of total assets. Due to the uncertainty of the rapid changes in product technology and market demand, the allowance for losses on decline in value and obsolescence of inventories involve significant management judgment, we therefore determined this a key audit matter.

Our audit procedures include, but are not limited to, obtaining an understanding of, and testing the effectiveness of, management's internal control over inventory, including obtaining an understanding of the reasonableness of management's policy for the allowance for losses on decline in value and obsolescence of inventories; assessing management's inventory planning, selecting significant inventory locations and conducting physical observations of inventory counts to confirm the quantity and condition of inventories; testing the adequacy of the allowance for losses on decline in value of inventories. This includes testing the reasonableness of the net realizable value of inventories by reviewing a sample of evidence relating to the purchase and sale of inventories, obtaining a sample of inventory ageing schedules to test the correctness of the ageing calculations and recalculating the reasonableness of the allowance for losses on obsolescence of inventories. We also considered the appropriateness of the disclosures in Notes 5 and 6 to the individual financial statements.

Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the ability to continue as a going concern of the Company, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the financial reporting process of the Company.

Auditor's Responsibilities for the Audit of the Parent Company Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company.

3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the accompanying notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2022 parent only financial statements and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

E-LEAD ELECTRONIC CO., LTD.

NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

For the Years Ended 31 December 2022 and 2021
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. History and organization

E-LEAD Electronic Co., Ltd. (the “Company”) was incorporated in Republic of China (R.O.C) on 22 June 1983. The Company mainly engaged in automotive electronics and its main products include head-up displays (WHUD、2D/3D ARHUD, 2D/3D digital electronic rear view mirror HUD), DMS, In-car audio/video navigation console, rear seat entertainment system, reversing camera, 2D/3D surround view system, blind spot detection system, advanced driver-assistance systems (ADAS), wired/wireless chargers for vehicles, automotive air purifier, car recorder, distance vision eye care products, video camera changeover tapes, etc.

The shares of the Company commenced trading on Taipei Exchange in October 2001 and were listed on the Taiwan Stock Exchange on 4 February 2002.

2. Date and procedures of authorization of financial statements for issue

The parent company only financial statements of the Company were authorized for issue in accordance with a resolution of the Board of Directors’ meeting on 15 March 2023.

3. Newly issued or revised standards and interpretations

1. Changes in accounting policies resulting from applying for the first-time certain standards and amendments:

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission (“FSC”) and become effective for annual periods beginning on or after 1 January 2022. The new standards and amendments had no material impact on the Company.

2. Standards or interpretations issued, revised or amended, by International Accounting Standards Board ("IASB") which are endorsed by FSC, but not yet adopted by the Company as at the end of the reporting period are listed below:

Item	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
1	Disclosure Initiative - Accounting Policies – Amendments to IAS 1	1 January 2023
2	Definition of Accounting Estimates – Amendments to IAS 8	1 January 2023
3	Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12	1 January 2023

(1) Disclosure Initiative - Accounting Policies – Amendments to IAS 1

The amendments improve accounting policy disclosures that to provide more useful information to investors and other primary users of the financial statements.

(2) Definition of Accounting Estimates – Amendments to IAS 8

The amendments introduce the definition of accounting estimates and include other amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to help companies distinguish changes in accounting estimates from changes in accounting policies.

(3) Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12

The amendments narrow the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual periods beginning on or after 1 January 2023. The remaining standards and interpretations have no material impact on the Company.

3. Standards or interpretations issued, revised or amended, by IASB which are not endorsed by FSC, and not yet adopted by the Company as at the end of the reporting period are listed below.

Item	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
1	IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures	To be determined by IASB
2	IFRS 17 "Insurance Contracts"	1 January 2023
3	Classification of Liabilities as Current or Non-current – Amendments to IAS 1	1 January 2024
4	Lease Liability in a Sale and Leaseback – Amendments to IFRS 16	1 January 2024
5	Non-current Liabilities with Covenants – Amendments to IAS 1	1 January 2023

(1) IFRS 10"Consolidated Financial Statements" and IAS 28"Investments in Associates and Joint Ventures" — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors' interests in the associate or joint venture.

(2) IFRS 17 "Insurance Contracts"

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after 1 January 2023 (from the original effective date of 1 January 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after 1 January 2023.

(3) Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 “Presentation of Financial Statements” and the amended paragraphs related to the classification of liabilities as current or non-current.

(4) Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

(5) Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Company’s financial statements were authorized for issue, the local effective dates are to be determined by FSC. The new or amended standards and interpretations have no material impact on the Company.

4. Summary of significant accounting policies

1. Statement of compliance

The parent company only financial statements of the Company for the years ended 31 December 2022 and 2021 have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (“the Regulations”).

2. Basis of preparation

The Company prepared the parent company only financial statements in accordance with the Regulations. According to the Article 21 of the Regulation, which provided that the profit or loss and other comprehensive income for the period presented in the parent company only financial statements shall be the same as the profit or loss and other comprehensive income attributable to stockholders of the parent presented in the consolidated financial statements for the period, and the total equity presented in the parent company only financial statements shall be the same as the equity attributable to the parent company presented in the consolidated financial statements. Therefore, the Company accounted for its investments in subsidiaries using equity method and, accordingly, made necessary adjustments.

The parent company only financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The parent company only financial statements are expressed in thousands of New Taiwan Dollars (“NT$”) unless otherwise stated.

3. Foreign currency transactions

The Company’s parent company only financial statements are presented in its functional currency, New Taiwan Dollars (NT$).

Transactions in foreign currencies are initially recorded by the Company at the respective functional currency rates prevailing at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date. Non-monetary items measured at fair value in foreign currencies are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in foreign currencies are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

(1) Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.

(2) Foreign currency items within the scope of IFRS 9 “Financial Instruments” are accounted for based on the accounting policy for financial instruments.

(3) Exchange differences arising on a monetary item that forms part of a reporting entity’s net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

4. Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into NT$ at the closing rate of exchange prevailing at the reporting date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. The following partial disposals are accounted for as disposals:

(a) when the partial disposal involves the loss of control of a subsidiary that includes a foreign operation; and

(b) when the retained interest after the partial disposal of an interest in a joint arrangement or a partial disposal of an interest in an associate that includes a foreign operation is a financial asset that includes a foreign operation.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or joint arrangement that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

5. Current and non-current distinction

An asset is classified as current when:

(1) The Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle.
(2) The Company holds the asset primarily for the purpose of trading.
(3) The Company expects to realize the asset within twelve months after the reporting period.
(4) The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

(1) The Company expects to settle the liability in its normal operating cycle.
(2) The Company holds the liability primarily for the purpose of trading.
(3) The liability is due to be settled within twelve months after the reporting period.
(4) The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

6. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid time deposits or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

7. Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 Financial Instruments are recognized initially at fair value plus or minus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

(1) Financial instruments: Recognition and Measurement

The Company accounts for regular way purchase or sales of financial assets on the trade date..

The Company classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss considering both factors below:

A. the Company’s business model for managing the financial assets and
B. the contractual cash flow characteristics of the financial asset

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables, financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

A. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
B. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

A. purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.

B. financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income and are reported in the balance sheet as financial assets measured at fair value through other comprehensive income or loss if both of the following conditions are met:

A. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
B. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

A. A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
B. When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment
C. Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:
   (a) Purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
   (b) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, for certain equity investments within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Group made an irrevocable election to present the changes of the fair value in other comprehensive income at initial recognition. Amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and these investments should be presented as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represent a recovery of part of the cost of investment.

Financial asset measured at fair value through profit or loss

Financial assets were classified as measured at amortized cost or measured at fair value through other comprehensive income based on aforementioned criteria. All other financial assets were measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

(2) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

The Company measures expected credit losses of a financial instrument in a way that reflects:

A. an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes
B. the time value of money
C. reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions

The loss allowance is measures as follow:

A. At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company measures the loss allowance at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that the credit risk on a financial asset has increased significantly since initial recognition is no longer met.
B. At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
C. For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.
D. For lease receivables arising from transactions within the scope of IFRS 16, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company assesses whether the credit risk on a financial asset has increased significantly since the initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

(3) Derecognition of financial assets

Financial asset held by the Company is derecognized when:

A. The rights to receive cash flows from the asset have expired.
B. The Company has transferred the asset and substantially all the risks and rewards of the asset have been transferred.
C. The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred the control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

(4) Financial liabilities and equity instrument

Classification of liabilities or equity

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the acquisition price less direct issue costs.

Compound instrument

The Company evaluates the terms of the convertible bonds issued to determine whether it contains both a liability and an equity component. Furthermore, the Company assesses if the economic characteristics and risks of the put and call options contained in the convertible bonds are closely related to the economic characteristics and risk of the host contract before separating the equity element.

For the liability component excluding the derivatives, its fair value is determined based on the rate of interest applied at that time by the market to instruments of comparable credit status. The liability component is classified as a financial liability measured at amortized cost before the instrument is converted or settled. For the embedded derivative that is not closely related to the host contract (for example, if the exercise price of the embedded call or put option is not approximately equal on each exercise date to the amortized cost of the host debt instrument), it is classified as a liability component and subsequently measured at fair value through profit or loss unless it qualifies for an equity component. The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. Its carrying amount is not remeasured in the subsequent accounting periods. If the convertible bond issued does not have an equity component, it is accounted for as a hybrid instrument in accordance with the requirements under IFRS 9 *Financial Instruments*.

Transaction costs are apportioned between the liability and equity components of the convertible bond based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

On conversion of a convertible bond before maturity, the carrying amount of the liability component being the amortized cost at the date of conversion is transferred to equity.

Financial liabilities

Financial liabilities within the scope of IFRS 9 Financial Instruments are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated as at fair value through profit or loss.

A financial liability is classified as held for trading if:

A. it is acquired or incurred principally for the purpose of selling in the near term,
B. on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking, or
C. it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial liability at fair value through profit or loss; or a financial liability may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

A. it eliminates or significantly reduces a measurement or recognition inconsistency, or
B. a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the Company is provided internally on that basis to the key management personnel.

Gains or losses on the subsequent measurement of liabilities at fair value through profit or loss including interest paid are recognized in profit or loss.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include account payables and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(5) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

8. Derivative instruments

The Company uses derivative financial instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as assets or liabilities at fair value through profit or loss except for derivatives that are designated effective hedging instruments which are classified as derivative financial assets or liabilities for hedging.

Derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognized in equity.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value though profit or loss.

9. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

(1) In the principal market for the asset or liability, or
(2) In the absence of a principal market, in the most advantageous market for the asset or liability

The primary or most advantageous market must be accessible to the Company for trading purposes.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, if market participants in their economic best interest.

A fair value measurement of a non-financial asset takes a market participant’s ability to generate economic benefits into account by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

10. Inventories

Inventories are valued at lower of cost and net realizable value item by item.

Costs incurred in bringing each inventory to its saleable or production-ready condition are accounted for as follows:

Raw materials	－The weighted average method is used to calculate the actual cost of goods imported.
Working in progress, semi-finished products and finished products	－Includes direct raw materials, direct labor, fixed manufacturing costs and variable manufacturing costs apportioned to normal production capacity, excluding borrowing costs.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rendering of services is accounted in accordance with IFRS 15 and not within the scope of inventories.

11. Investments accounted for using the equity method

According to Article 21 of the Regulation, the Company's investment in subsidiaries was presented as "Investments accounted for using equity method" and made necessary adjustments. The profit or loss during the period and other comprehensive income presented in the parent company only financial statements shall be the same as the allocations of profit or loss during the period and of other comprehensive income attributable to shareholders of the parent presented in the financial statements prepared on a consolidated basis, and the shareholders' equity presented in the parent company only financial statements shall be the same as the equity attributable to shareholders of the parent presented in the financial statements prepared on a consolidated basis. The adjustment was considered the difference between investment in subsidiaries in consolidated financial statements according to IFRS 10 "Consolidated financial statements" and application of IFRS to different reporting entities, debit/credit "Investment accounted for using equity method", "Share of profit or loss of subsidiaries, associates and joint ventures" or "Share of other comprehensive profit or loss of subsidiaries, associates and joint ventures" etc.

The Company's investment in its associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Company has significant influence. Joint venture means the Company has rights to the net assets of the joint agreement (with joint controller).

Under the equity method, the investment in the associate or an investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company's share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Company and the associate or joint venture are eliminated to the extent of the Company's related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Company's percentage of ownership interests in the associate or joint venture, the Company recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a proportionate basis.

When the associate or joint venture issues new stock, and the Company's interest in an associate or a joint venture is reduced or increased as the Company fails to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in additional paid-in capital and investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a proportionate basis when the Company disposes the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 "Investments in Associates and Joint Ventures". If this is the case the Company calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 "Impairment of Assets". In determining the value in use of the investment, the Company estimates:

(1) Its share of the present value of the estimated future cash flows expected to be generated by the associate or joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or

(2) The present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 Impairment of Assets.

Upon loss of significant influence over the associate or joint venture, the Company measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

12. Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 “Property, plant and equipment”. When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives:

Items	Useful Lives
Buildings	5 to 55 years
Machinery and equipment	2 to 15 years
Transportation equipment	2 to 10 years
Office equipment	5 to 8 years
Other equipment	3 to 35 years

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognized in profit or loss.

The residual values, useful lives and methods of depreciation of plant, property and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate, and are treated as changes in accounting estimates.

13. Leases

The Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use, has both of the following:

(1) The right to obtain substantially all the economic benefits from use of the identified asset, and
(2) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximizing the use of observable information.

Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

(1) fixed payments (including in-substance fixed payments), less any lease incentives receivable,
(2) variable lease payments that depend on an index or a rate, (initially measured using the index or rate as at the commencement date),
(3) amounts expected to be payable by the lessee under residual value guarantees,
(4) the exercise price of a purchase option if the Company is reasonably certain to exercise that option, and
(5) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method; and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

(1) the amount of the initial measurement of the lease liability,
(2) any lease payments made at or before the commencement date, less any lease incentives received,
(3) any initial direct costs incurred by the lessee, and
(4) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 “Impairment of Assets” to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Company accounted for as short-term leases or leases of low-value assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statements of comprehensive income.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis

The Company opted not to assess whether the relevant rent reductions that occurred as a direct result of Covid-19 were lease modifications. Such rent reductions are treated as changes in lease payments and the practical expedient has been applied to all eligible rent reductions.

Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Company recognizes assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease. For contracts with lease components as well as non-lease components, the Company applies IFRS 15 to apportion the consideration in the contract.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

14. Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life is reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are recognized in profit or loss.

A summary of the policies applied to the Company's intangible assets is as follows:

	Trademark	Patents	Computer software
Useful lives	1 to 5 years	1 to 5 years	1 to 10 years
Amortization method used	Straight-line basis	Straight-line basis	Straight-line basis
Internally generated or acquired	Acquired	Acquired	Acquired

15. Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The recoverable amount is the higher of the net fair value or value in use.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset’s or cash-generating unit’s recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

A cash generating unit, or groups of cash-generating units, to which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill allocated to the cash generating unit (group of units), then to the other assets of the unit (group of units) pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

16. Provision

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event, it is probably that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

17. Revenue recognition

The Company’s revenue arising from contracts with customers are primarily related to sale of goods. The accounting policies are explained as follows:

Sale of goods

The Company manufactures and sells products. Sales are recognized when control of the goods is transferred to the customer and the goods are delivered to the customers. The main products of the Company are automotive electronics and revenue is recognized based on the consideration stated in the contract.

The credit period for the Company's sales of goods transactions is normally from receipt of payment prior to shipment to 90 days at the end of the month. For most of the contracts, when the Company transfers the goods to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The Company usually collects the payments shortly after transfer of goods to customers; therefore, there is no significant financing component to the contract. For some of the contracts, the Company has transferred the goods to customers but does not has a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Company measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

However, for some contracts, part of the consideration was received from customers upon signing the contract, and the Company has the obligation to provide the services subsequently; accordingly, these amounts are recognized as contract liabilities.

The period between the transfers of contract liabilities to revenue is usually within one year, thus, no significant financing component is arised.

18. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds

19. Government grants

The Company recognizes government grant income when it is reasonably certain that the conditions set forth in the government grant will be met and that an inflow of economic benefits from the government grant will be received. When the grant relates to an asset, the government grant is recognized as deferred revenue and recognized as income over the expected life of the related asset; When a grant relates to an expense item, the government grant is recognized as revenue in the period in which the related costs are expected to be incurred, using a reasonable and systematic method.

When the Company receives non-monetary government grants, it recognizes the assets and grants received in nominal amounts and recognizes the income in equal installments over the expected useful life of the subject assets and the pattern of consumption of the benefits in the consolidated statement of comprehensive income. Loans or similar grants at below-market interest rates obtained from the Government or related institutions are regarded as additional government grants.

20. Post-employment benefits

All regular employees of the Company are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee’s name in the specific bank account. and hence, not associated with the Company. Therefore, fund assets are not included in the Company’s parent only financial statements.

For the defined contribution plan, the Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Re-measurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

(1) the date of the plan amendment or curtailment, and
(2) the date that the Company recognizes restructuring-related costs or termination benefits.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

21. Income tax

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

<u>Current income tax</u>

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

(1) Initial recognition of goodwill; Or where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

(2) In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

(1) Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

(2) In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same tax authority.

5. Significant accounting judgments, estimates and assumptions

The preparation of the parent company only financial statements require management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumption and estimate could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

1. Judgements

In the process of adopting the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the parent only financial statements:

Operating lease commitments - Company as lessor

The Company has entered into commercial real estate leases for its investment real estate portfolio. Based on an assessment of their contractual terms, the Company retains significant risks and rewards of ownership of these immovable properties and treats these leases as operating leases.

2. Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(1) Post-employment benefit plans

The present value of the pension cost and defined benefit obligation of the post-employment benefit plans is based on actuarial valuations. The actuarial valuation involves various assumptions, including: discount rates and changes in expected payroll.

(2) Income tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective counties in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective company's domicile.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Deferred tax assets are recognized for all carry forward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies.

(3) Accounts receivables–estimation of impairment loss

The Company estimates the impairment loss of accounts receivables at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that expects to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6 for more details.

(4) Inventories

Estimates of net realisable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices have declined. The estimates are based on the most reliable evidence available at the time the estimates are made. Please refer to Note 6 for more details.

6. Contents of significant account

1. Cash and cash equivalents

	As at	
	31 December 2022	31 December 2021
Cash on hand	$693	$578
Demand deposits and cheque deposits	225,528	192,888
Cash equivalent	341	322
Total	$226,562	$193,788

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

2. Financial assets at fair value through profit or loss - current

	As at	
	31 December 2022	31 December 2021
Mandatorily measured at fair value through profit or loss：		
Funds	$3,081	$ -
Redeemable bond	540	-
Total	$3,621	$ -

Financial assets at fair value through profit or loss – current were not pledged.

3. Accounts receivables and accounts receivable - related parties

	As at	
	31 December 2022	31 December 2021
Accounts receivables – non affiliate	$274,396	$132,745
Less: allowance for losses	(488)	(38)
Less: allowance for exchange losses	(2,444)	(256)
Subtotal	271,464	132,451
Accounts receivable – related parties	525,968	214,104
Add: allowance for exchange losses (gain)	(1,134)	140
Subtotal	524,834	214,244
Total	$796,298	$346,695

Account receivables were not pledged.

The credit period for the Company's customers is normally from receipt of payment prior to shipment to 90 days at the end of the month. Please refer to Note 6.15 for details on allowance for loss and Note 12 for details on credit risk management.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

4. Inventories

	As at	
	31 December 2022	31 December 2021
Raw materials	$107,831	$135,574
Semi-finished products	41,487	19,049
Work in progress	60,290	48,769
Finished products	4,739	7,019
Total	$214,347	$210,411

The cost of inventories recognized in operating costs amounts to NT$1,499,099 thousand and NT$1,038,852 thousand for the years ended 31 December 2022, including the gain on reversal of write-down of inventories of NT$36,142 thousand and NT$29,676 thousand.

The gain on reversal of write-down of inventories was recognized in 2022 and 2021 as a result of the scraps of some of the inventories previously recorded as declines in valuation and the continuing liquidation of slow-moving inventories.

The above mentioned inventories were not pledged.

5. Investments accounted for using the equity method

The list of the Company's investments is as follows:

	As at			
	31 December 2022		31 December 2021	
Name of the investees	Amount	%	Amount	%
Investments in subsidiaries:				
E-LEAD TECHNOLOGY CO., LTD.(BVI)	$298,032	100%	$312,321	100%
E-LEAD ELECTRONIC (THAILAND) CO., LTD.	689,946	100%	522,903	100%
HUGE PROFIT CO., LTD.	7,842	100%	3,706	100%
Subtotal	995,820		838,930	
Investments in associates:				
RUTER ELASTOMER CO., LTD.	6,381	19%	6,721	19%
Total	$1,002,201		$845,651	

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The gain or loss on investments recognized under the equity method and the translation adjustments for the years ended 31 December 2022 and 2021 are as follows:

	2022			2021		
Name of the investees	Investment income	Translation adjustment	Total	Investment (loss) income	Translation adjustment	Total
E-LEAD(BVI)	$95,012	$5,284	$100,296	$85,929	$(1,877)	$84,052
HUGE	2,846	-	2,846	361	-	361
E-LEAD THAILAND	131,109	44,363	175,472	96,364	(60,211)	36,153
E-LEAD CAYMAN	-	-	-	(125)	-	(125)
RUTER	1,267	-	1,267	1,932	-	1,932
Total	$230,234	$49,647	$279,881	$184,461	$(62,088)	$122,373

(1) Investments in subsidiaries

Investments in subsidiaries were expressed as “Investments accounted for using the equity method” in the parent company only financial statements, and the necessary valuation adjustments were made.

E-LEAD TECHNOLOGY (CAYMAN) CO., LTD. completed the liquidation in October 2021 and recovered investment in shares of NT$901 thousand in the same year.

(2) Investments in associates

The Company's investment in RUTER ELASTOMER CO., LTD. is not material to the Company. The long-term investment evaluation and recognition of investment gains and losses are based on the unaudited accounts of the investee company. The aggregated financial information is shown below based on the total shareholdings:

	For the years ended 31 December	
	2022	2021
Net loss from continuing operations for the period	$1,267	$1,932
Other comprehensive income (net of tax)	-	-
Total comprehensive income	$1,267	$1,932

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

As at 31 December 2022 and 31 December 2021, the aforementioned investment in associates had no contingent liabilities or capital commitments, and was not pledged

The Company and the Company's senior executives have a consolidated shareholding of more than 20% in RUTER ELASTOMER CO., LTD. and therefore have material impact.

6. Property, plant and equipment

	As at	
	31 December 2022	31 December 2021
Owner occupied property, plant and equipment	$674,005	$644,623
Property, plant and equipment leased out under operating leases	-	-
Total	$674,005	$644,623

There were no additions and disposals of property, plant and equipment leased out under operating leases in 2022 and 2021. The consolidated owner occupied property, plant and equipment and those leased out under operating leases are presented below.

	1 January 2022 to 31 December 2022			
	1 January 2022	Additions	Disposals	31 December 2022
Cost:				
Land and land improvements	$385,656	$ -	$ -	$385,656

10. Bonds payables

	As at	
	31 December 2022	31 December 2021
Liability component:		
Value of domestic convertible bonds payable	$300,000	$ -
Discount on domestic convertible bonds payable	(11,902)	-
Subtotal	288,098	-
Less: current portion	-	-
Total	$288,098	$ -
Embedded derivative financial instrument	$(540)	$ -
Equity component	$26,931	$ -

The Company issued second domestic secured convertible bonds with a coupon rate of 0% on 7 July 2022. The convertible bonds, evaluated in accordance with the contractual terms, consist of a bond principal, an embedded derivatives (a call option and a put option) and an equity component (an option for conversion into issuer’s ordinary shares). The terms of the bonds are as follows:

Issue amount: NT$300,000 thousand, issued at 104.97% of par value and the total amount raised was NT$314,901 thousand.

Period of issue: 7 July 2022 to 7 July 2025

Important redemption clauses:

A. The Company may redeem the bonds, in whole or in part, after 3 months of the issuance (8 October 2022) and 40 days prior to the maturity date (28 May 2025), at the principal amount of the bonds (the “early redemption conversion price”) if the closing price of the Company’s ordinary shares on the Taiwan Stock Exchange (TWSE) for a period of 30 consecutive trading days, is at least 30% (inclusive) of the conversion price.

B. The Company may redeem the bonds after 3 months of the issuance (8 October 2022) and 40 days prior to the maturity date (28 May 2025), in whole or in part, at the early redemption conversion price if the outstanding balance of the convertible bonds is less than 10% of the original issue amount.

C. If the creditor does not reply in writing to the Company's securities agent (effective upon delivery and postmarked by the postmark date) by the date set out in the “Notice of Call for Bonds”, the Company may redeem the bonds in cash at their face value within 5 business days after the call date.

Terms of Exchange:

A. Underlying Securities: Common shares of the Company.

B. Exchange Period: The bonds holders may request conversion into common shares of the Company from 8 October 2022 until 7 July 2025 in lieu of cash repayment from the Company.

C. Exchange Price and Adjustment: The exchange price was originally NT$85 per share. The exchange price will be subject to adjustments upon the occurrence of certain events set out in the indenture. The exchange price as of 31 December 2022 was NT$84.6 per share.

D. Redemption on the Maturity Date: On the maturity date, the Company will redeem the bonds that remain outstanding at the principal amount.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The Company assessed the aforementioned financial instruments in accordance with IFRS 9 compound financial instrument, and therefore allocated the purchase price to the liability component and the equity component. The allocation is made to the equity component at the fair value of the compound financial instrument less the amount of the separately measured liability component. The difference between the amount apportioned to the liability component and its carrying amount is recognized in profit or loss, and the difference between the amount apportioned to the equity component and its carrying amount is recognized as "additional paid in capital - stock options". As at 31 December 2022, the amount of financial assets at fair value through profit or loss for convertible bonds issued was NT$540 thousand.

11. Long-term borrowings

Less: current portion			(144,000)
Total			$157,083
Interest rate band			1.05%-1.35%

Certain land and buildings are pledged as first priority security for secured bank loans and credit loans are guaranteed by related parties, please refer to Note 7 and 8 for more details.

12. Post-employment benefits

Defined contribution plan

The Company adopts a defined benefit plan in accordance with the Labor Pension Act of the R.O.C. Under the Labor Pension Act, the Company will make monthly contributions of no less than 6% of the employees' monthly wages to the employees' individual pension accounts. The Company have made monthly contributions of 6% of each individual employee's salaries or wages to employees' pension accounts.

Pension expenses under the defined contribution plan for the years ended 31 December 2022 and 2021 were NT$16,667 thousand and NT$14,490 thousand, respectively.

Defined benefits plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15 year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount based on actuarial reports on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee. Before the end of each year, the Company assesses the balance in the designated labor pension fund. If the amount is inadequate to pay pensions calculated for workers retiring in the same year, the Company will make up the difference in one appropriation before the end of March the following year.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandation, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statement shall not be less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Company expects to contribute NT$520 thousand to its defined benefit plan during the 12 months beginning after 31 December 2022.

As at 31 December 2022, the Company's defined benefit plans are expected to expire after 9 years.

Pension costs under defined benefit plans recognized in profit or loss are as

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Pension costs under defined benefit plans recognized in profit or loss are as follows:

	For the years ended 31 December	
	2022	2021
Current period service costs	$ -	$ -
Net interest on net defined benefit liability (asset)	520	306
Total	$520	$306

Reconciliation of the present value of the defined benefit obligation to the fair value of plan assets is as follows:

	As at		
	31 December 2022	31 December 2021	1 January 2021
Present value of defined benefit obligation	$122,657	$115,755	$116,800
Plan assets at fair value	(45,311)	(41,412)	(40,310)
Net defined benefit liabilities - non-current	$77,346	$74,343	$76,490

Reconciliation of liability (asset) of the defined benefit plan:

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liabilities (assets)
As at 1 January 2021	$116,800	$(40,310)	$76,490
Interest expense (income)	467	(161)	306
Subtotal	117,267	(40,471)	76,796
Remeasurements of the net defined benefit liability/ asset:			
Actuarial gains and losses arising from changes in demographic assumptions	120	-	120
Actuarial gains and losses arising from changes in financial assumptions	(3,675)	(618)	(4,293)
Experience adjustments	2,043	-	2,043
Subtotal	115,755	(41,089)	74,666

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liabilities (assets)
Contributions by employer	-	(323)	(323)
As at 31 December 2021	$115,755	$(41,412)	$74,343
Interest expense (income)	810	(290)	520
Subtotal	116,565	(41,702)	74,863
Remeasurements of the net defined benefit liability/ asset:			
Actuarial gains and losses arising from changes in financial assumptions	(6,389)	(3,107)	(9,496)
Experience adjustments	12,481	-	12,481
Subtotal	122,657	(44,809)	77,848
Contributions by employer	-	(502)	(502)
As at 31 December 2022	$122,657	$(45,311)	$77,346

The following key assumptions are used to determine the defined benefit plan of the Company:

	As at	
	31 December 2022	31 December 2021
Discount rate	1.30%	0.70%
Expected rate of salary increases	2.50%	2.50%

Sensitivity analysis for each significant actuarial assumption:

	For the years ended 31 December			
	2022		2021	
	Increase defined benefit obligation	Decrease defined benefit obligation	Increase defined benefit obligation	Decrease defined benefit obligation
Discount rate increases by 0.25%	$ -	$(2,502)	$ -	$(2,837)
Discount rate decreases by 0.25%	2,594	-	2,951	-
Future salary increases by 0.25%	2,310	-	2,647	-
Future salary decreases by 0.25%	-	(2,243)	-	(2,564)

The sensitivity analyses above are based on a change in a significant assumption (for example: change in discount rate or future salary), keeping all other assumptions constant. The sensitivity analyses may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

There was no change in the methods and assumptions used in preparing the sensitivity analyses compared to the previous period.

13. Equities

(1) Common stock

	As at	
	31 December 2022	31 December 2021
Number of shares (in thousands)	200,000	200,000
Authorized share capital	$2,000,000	$2,000,000
Number of shares issued and received in full (in thousands)	122,798	118,798
Share capital issued	$1,227,985	$1,187,985

On 4 May 2022, the Board of Directors resolved to issue 4,000,000 new shares of NT$10 each in cash at NT$80 per share. In accordance with Section 267 of the Company Act, 15% of the total number of new shares issued, amounting to 600,000 shares, are reserved for subscription by the Company's employees on a preferential basis. Due to market changes and fluctuations in stock prices, the actual price of the cash capital increase and the employee stock option price of NT$60 per share were measured based on the fair value of the stock options on the date of issuance, and remuneration costs and additional paid-in capital of NT$5,304 thousand were recognized, resulting in a paid-in capital of NT$1,227,985 thousand after the capital increase. The above cash capital increase was approved by the Securities and Futures Bureau of the Financial Supervisory Commission on 8 June 2022, and the Board of Directors has authorized the Chairman to determine 19 August 2022 as the base date for the capital increase and to complete the registration of the change on 6 September 2022. The ordinary shares in issue have a par value of NT$10 each and carry a right to vote and receive dividends.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(2) Additional paid-in capital

	As at	
	31 December 2022	31 December 2021
Issue premium	$209,175	$9,175
Conversion premium on conversion of corporate bonds	207,397	207,397
Convertible bonds - stock options	26,931	-
Cash capital increase – Employee stock options	5,304	-
Gain on disposal of assets	215	215
Total	$449,022	$216,787

According to the Company Act, the capital reserve shall not be used except for making good the deficit of the company. When a company incurs no loss, it may distribute the capital reserves related to the income derived from the issuance of new shares at a premium or income from endowments received by the company. The distribution could be made in cash or in the form of dividend shares to its shareholders in proportion to the number of shares being held by each of them.

(3) Retained earnings and dividend policies

According to the Company's Articles of Incorporation, current year's earnings, if the Company has a surplus after the annual final accounts, the Company shall, in addition to paying income tax, first make up for the deficit of previous years and then set aside 10% of the remaining amount as a legal reserve and set aside or reverse a special reserve in accordance with the law, and the Board of Directors shall prepare a proposal for the distribution of the remaining amount together with the accumulated undistributed earnings at the beginning of the period and submit it to the shareholders' meeting for resolution on the distribution of dividends to shareholders. The Company's dividend distribution is in line with the current year's earnings and is based on the principle of dividend stability and the Company's long-term development plan. Which is not less than 50% of the distributable earnings after tax for the year.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

According to the Company Act, the Company needs to set aside amount to legal reserve unless where such legal reserve amounts to the total paid-in capital. The legal reserve can be used to make good the deficit of the Company. When the Company incurs no loss, it may distribute the portion of legal serve which exceeds 25% of the paid-in capital by issuing new shares or by cash in proportion to the number of shares being held by each of the shareholders.

The FSC on 31 March 2021 issued Order No. Financial – Supervisory – Securities – Corporate – 1090150022, which sets out the following provisions for compliance. On a public company's first-time adoption of the IFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded to shareholders’ equity that the company elects to transfer to retained earnings by application of the exemption under IFRS 1, the company shall set aside special reserve. The Company has not made any first-time adoption that would require a provision for special reserve and therefore this letter order has no impact on the Company.

At the Board of Directors' Meeting and the Shareholders' Meeting held on 15 March 2023 and 15 June 2022, the Company proposed and resolved the distribution of earnings for 2022 and the appropriation of deficit for 2021 respectively.

Please refer to Note 6.17 for details on employees’ remuneration and remuneration to directors and supervisors.

14. Operating revenue

	For the years ended 31 December	
	2022	2021
Revenue from contracts with customers		
Revenue from sale of goods	$1,951,909	$1,176,540
Other revenue	221,364	169,306
Total	$2,173,273	$1,345,846

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Information regarding the Company's revenue from contracts with customers for 2022 and 2021 is as follows:

Revenue from contracts with customers is recognized at a point in time.

(1) Contract balance

A. Contract asset - current

The Company has no contract assets as at 31 December 2022 and 31 December 2021.

B. Contract liability - current

	As at		
	31 December 2022	31 December 2021	1 January 2021
Sale of goods	$9,302	$7,701	$1,836

The significant changes in the Company's balances of contract liabilities for the year ended 31 December 2022 and 2021 are as follows:

	For the years ended 31 December	
	2022	2021
The opening balance transferred to revenue	$(2,821)	$(1,770)
Increase in receipts in advance during the period (excluding the amount incurred and transferred to revenue during the period)	4,422	7,634

(2) Transaction price allocated to unsatisfied performance obligations

For the years ended 31 December 2022 and 2021, the Company was not required to provide information regarding unsatisfied performance obligations as the Company's contracts with customers for the sale of goods were less than one year.

(3) Assets recognized from costs to fulfil a contract

None.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

15. Expected credit losses/ (gains)

	For the years ended 31 December	
	2022	2021
Operating expenses – Expected credit losses/(gains)		
Accounts receivable	$450	$(8)

Please refer to Note 12 for more details on credit risk.

The Company's notes receivable and accounts receivable are measured as an allowance for loss using the lifetime expected credit losses, considering the credit rating of the counterparties and other factors, and using an allowance matrix to measure the allowance for loss. The assessment of the Company’s loss allowance as at 31 December 2022 and 2021 is as follows:

As at 31 December 2022		Past due					
	Undue	<30 days	31-60 days	61-90 days	91-180 days	>181 days	Total
Gross carrying amount	$796,783	$15	$212	$ -	$3	$4	$797,017
Loss rate	0.03%	80%	100%	-	100%	100%	
Lifetime expected credit losses	(257)	(12)	(212)	-	(3)	(4)	(488)
Total	$796,526	$3	$ -	$ -	$ -	$ -	$796,529

As at 31 December 2021		Past due					
	Undue	<30 days	31-60 days	61-90 days	91-180 days	>181 days	Total
Gross carrying amount	$346,941	$ -	$1	$ -	$ -	$ -	$346,942
Loss rate	0.03%	-	100%	-	-	-	
Lifetime expected credit losses	(37)	-	(1)	-	-	-	(38)
Total	$346,904	$ -	$ -	$ -	$ -	$ -	$346,904

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The movement in the provision for impairment of account receivables during the years ended 31 December 2022 and 2021 is as follows:

	Account receivables
As at 1 January 2022	$38
Addition for the current period	450
As at 31 December 2022	$488
As at 1 January 2021	$46
Reversal for the current period	(8)
As at 31 December 2021	$38

16. Leases

(1) Company as a lessee

The Company leases various properties, including real estate such as land and buildings, machinery and equipment and transportation equipment. The lease terms range from 2 to 10 years.

The Company's leases effect on the financial position, financial performance and cash flows are as follow:

Salaries	$149,411	$249,333	$398,744	$114,773	$189,579	$304,352
Labor and health insurance	16,554	20,552	37,106	12,860	18,086	30,946
Pension	7,086	10,101	17,187	5,647	9,149	14,796
Remuneration to directors	-	6,638	6,638	-	4,892	4,892
Other employee benefits expense	3,985	6,254	10,239	3,185	4,991	8,176
Depreciation	46,230	5,523	51,753	45,917	7,361	53,278
Amortization	232	12,907	13,139	285	8,825	9,110

(1) The number of employees of the Company for the year and the previous year were 560 and 475 respectively, of which the numbers of directors who were not concurrently employees were 6.

A. For the years ended 31 December 2022 and 2021, the average of employee benefit expenses of the Company were NT$836 thousand and NT$764 thousand, respectively
B. For the years ended 31 December 2022 and 2021, the average of salaries of the Company were NT$720 thousand and NT$649 thousand, respectively
C. Change in average salaries adjustment is 10.94%
D. The Company has a policy on directors' remuneration and employees' remuneration as set out in the Articles of Incorporation and has established a Remuneration Committee to evaluate and supervise the remuneration system of the directors and managers of the Company. In addition to the Company's operational performance, future risks, strategic development and industry trends, the Company also considers the individual's contribution to the Company's performance and provides reasonable remuneration.

The Company complies with legal requirements and the needs of each region and has developed a comprehensive staff welfare system to provide good remuneration and benefits to its employees. Employee compensation consists of a monthly salary and employee remuneration based on annual profitability and the provisions of the Articles. The company conducts regular performance appraisals for all staff every year to ensure that the performance of staff is understood and used as a basis for promotion, training and development and salary payment.

The Company's policy on directors' and employees' remuneration as set out in the Articles of Association is that no less than 1% of employees' remuneration and no more than 5% of directors' remuneration shall be paid in the event of the Company making a profit in a year. However, where the Company has accumulated losses, the amount of the indemnity should be retained in advance. The profit for the year referred to in the preceding paragraph means the profit before taxation for the year before the distribution of remuneration to employees and directors. The distribution of remuneration to employees and directors shall be made by a resolution of the Board of Directors passed with the presence of at least two-thirds of the directors and the concurrence of a majority of the directors present and reported to the shareholders' meeting.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Based on the profit of the year ended 31 December 2022, the Company estimated the amounts of the employees' compensation and remuneration to directors for the year ended 31 December 2022 to be 3% and 1.5% which were recognized as salary expense. As such, employees' compensation and remuneration to directors for the year ended 31 December 2022 amount to NT$9,247 thousand and NT$4,624 thousand, respectively. On 15 March 2023, the Board of Directors proposed to distribute the employees' compensation and remuneration to directors; No employees' compensation and remuneration to directors were distributed in 2021 as deficits were yet to be covered.

18. Non-operating income and expenses

Unused tax losses	97,757	11,978	-	109,735
Deferred tax (expense)/ income		$(30,006)	$11,992	
Net deferred tax assets/(liabilities)	$116,310			$98,296
Reflected in balance sheet as follows:				
Deferred tax assets	$132,303			$137,171
Deferred tax liabilities	$(15,993)			$(38,875)

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(3) The following table contains information of the unused tax losses of the Company:

Year	Unused balance 31 December 2022	Unused balance 31 December 2021	Expiration year
2017	$ -	$110,178	2027
2018	12,251	122,313	2028
2019	122,091	122,091	2029
2020	134,203	134,203	2030
2021	59,922	59,889	2031

(4) Unrecognized deferred tax assets

None.

(E) The assessment of income tax returns

For the year ended 31 December 2022, the Company's income tax returns have been approved up to 2020.

21. Earnings per share

Basic earnings per share amounts are calculated by dividing net profit for the year attributable to ordinary equity holders of the parent entity by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit attributable to ordinary equity holders of the parent entity (after adjusting for interest on the convertible preference shares) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

	For the years ended 31 December	
	2022	2021
(1)Basic earnings per share		
Net profit for the period	$346,571	$96,520
Weighted average number of ordinary shares outstanding for basic earnings per share (in thousands)	120,278	118,798
Basic earnings per share (NT$)	$2.88	$0.81
(2) Diluted earnings per share		
Net profit for the period	$346,571	$96,520
Interest expense from convertible bonds	1,846	-
Net profit for the period after dilution	$348,417	$96,520
Weighted average number of ordinary shares outstanding for basic earnings per share (in thousands)	120,278	118,798
Effect of dilution:		
Employee compensation－stocks (in thousands)	132	-
Convertible bonds (in thousands)	1,729	-
Weighted average number of ordinary shares outstanding after dilution (in thousands)	122,139	118,798
Diluted earnings per share (NT$)	$2.85	$0.81

There have been no material transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of completion of the financial statements.

7. Related party transactions

Information of the related parties that had transactions with the Company during the financial reporting period is as follows:

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Name and nature of relationship of the related parties

Name of the related parties	Nature of relationship of the related parties
E-LEAD ELECTRONIC TECHNOLOGY(JIANGSU) CO., LTD.	Sub-subsidiary
E-LEAD ELECTRONIC (THAILAND) CO., LTD.	Subsidiary
HUGE PROFIT CO., LTD.	Subsidiary
OKAY ENTERPRISE CO., LTD.	The person in charge is the Chairman of the Company
SUZHOU FAR HORIZON TRADING CO., LTD.	The Chairman of the Company is first degree relatives to the person in charge
Hsi-Hsun Chen	Chairman of the Company
Hsi-Yao Chen	Deputy Chairman of the Company
Hsi-Tsang Chen	Group CEO of the Company
Li-Li Chen	First degree relatives to the Chairman of the Company

1. Sales

	For the years ended 31 December	
	2022	2021
E-LEAD ELECTRONIC (THAILAND) CO., LTD.	$540,294	$383,510
E-LEAD ELECTRONIC TECHNOLOGY(JIANGSU) CO., LTD.	437,499	209,044
OKAY ENTERPRISE CO., LTD.	8,030	2,644
Total	$985,823	$595,198

The sales price to the related parties was determined through mutual agreement based on the market rates. The collection period for domestic sales to related parties was based on normal sales terms.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

2. The technical services and licensing contracts, management and development services contracts for specific products entered into between the Company and its related parties, E-LEAD Jiangsu and E-LEAD THAILAND. The technical services revenue is to be received in accordance with the contracts for the years ended 31 December 2022 and 2021. The accounts receivable as of 31 December 2022 and 2021, are as follows:

	For the years ended 31 December			
	2022		2021	
Name of related parties	Revenue from technical service	Uncollected amount (Note)	Revenue from technical service	Uncollected amount (Note)
E-LEAD ELECTRONIC (THAILAND) CO., LTD.	$166,905	$32,396	$85,814	$19,599
E-LEAD ELECTRONIC TECHNOLOGY(JIANGSU) CO., LTD.	33,955	29,756	58,877	21,446
Total	$200,860	$62,152	$144,691	$41,045

Note: Excluding adjustments for gains and losses on foreign currency translation.

3. Purchases

	For the years ended 31 December	
	2022	2021
E-LEAD ELECTRONIC (THAILAND) CO., LTD.	$154,557	$80,176
E-LEAD ELECTRONIC TECHNOLOGY(JIANGSU) CO., LTD.	124,829	1,847
OKAY ENTERPRISE CO., LTD.	119,495	103,729
SUZHOU FAR HORIZON TRADING CO., LTD.	16,657	-
Total	$415,538	$185,752

The purchase price to the related parties was determined through mutual agreement based on the market rates. The payment terms from the related party suppliers are comparable with third party suppliers and are between 45-60 days per months.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

4. Account receivables - related parties

	As at	
	31 December 2022	31 December 2021
E-LEAD ELECTRONIC TECHNOLOGY(JIANGSU) CO., LTD.	$343,606	$110,154

Lease liabilities	3,446	5,064
Total	$1,063,501	$1,033,167

2. Financial risk management objectives and policies

The Company's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activates. The Company identifies measures and manages the aforementioned risks based on the Company's policy and risk appetite.

The Company has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Company complies with its financial risk management policies at all times.

3. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market prices comprise currency risk, interest rate risk and other price risk (such as equity risk).

In practice, it is rarely the case that a single risk variable will change independently from other risk variable, there is usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Foreign currency risk

The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense are denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign subsidiaries.

The Company has certain foreign currency receivables to be denominated in the same foreign currency with certain foreign currency payables, therefore natural hedge is received. The Company also uses forward contracts to hedge the foreign currency risk on certain items denominated in foreign currencies. Hedge accounting is not applied as they did not qualify for hedge accounting criteria. Furthermore, as net investments in foreign subsidiaries are for strategic purposes, they are not hedged by the Company.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Company's profit is performed on significant monetary items denominated in foreign currencies as at the end of the reporting period. The Company's foreign currency risk is mainly related to the volatility in the exchange rates for RMB and USD. The information of the sensitivity analysis is as follows:

(1) When NTD strengthens/weakens against RMB by 1%, the profit for the years ended 31 December 2022 and 2021 is increased/decreased by NT$5,046 thousand and NT$2,105 thousand, respectively.

(2) When NTD strengthens/weakens against USD by 1%, the profit for the years ended 31 December 2022 and 2021 is increased/decreased by NT$5,043 thousand and NT$2,623 thousand, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's investments at variable interest rates, bank borrowings with fixed interest rates and variable interest rates.

The interest rate sensitivity analysis is performed on items exposed to interest rate risk as at the end of the reporting period, including investments and borrowings with variable interest rates and interest rate swaps. At the reporting date, a change of 10 basis points of interest rate in a reporting period could cause the profit for the years ended 31 December 2022 and 2021 to increase/decrease by NT$390 thousand and NT$611 thousand, respectively.

4. Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a contract, leading to a financial loss. The Company is exposed to credit risk from operating activities (primarily for accounts and notes receivables) and from its financing activities, including bank deposits and other financial instruments.

Credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to credit risk management. Credit limits are established for all counter parties based on their financial position, rating from credit rating agencies, historical experience, prevailing economic condition and the Company's internal rating criteria etc. Certain counter parties' credit risk will also be managed by taking credit enhancing procedures, such as requesting for prepayment or insurance.

As at 31 December 2022 and 2021, accounts receivables from the top ten customers represent 99% of the total accounts receivables of the Company. The credit concentration risk of accounts receivables is insignificant.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Credit risk from balances with banks, fixed income securities and other financial instruments is managed by the Company's treasury in accordance with the Company's policy. The Company only transacts with counterparties approved by the internal control procedures, which are banks and financial institutions, companies and government entities with good credit rating. Consequently, there is no significant credit risk for these counter parties.

5. Liquidity risk management

The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of cash and cash equivalents, bank borrowings, convertible bonds and finance leases. The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity. The payment amount includes the contractual interest. The undiscounted payment relating to borrowings with variable interest rates is extrapolated based on the estimated interest rate yield curve as of the end of the reporting period.

Non-derivative financial liabilities

	< 1 year	2-3 years	4-5 years	> 5 years	Total
As at 31 December 2022					
Borrowings	$184,482	$47,630	$108,265	$65,212	$405,589

	Short-term borrowings	Long-term borrowings	Leases liabilities	Total liabilities from financing activities
As at 1 January 2021	$389,000	$383,250	$7,030	$779,280
Cash flows	(79,000)	(82,167)	(2,058)	(163,225)
Non-cash changes	-	-	92	92
As at 31 December 2021	$310,000	$301,083	$5,064	$616,147

7. Fair values of financial instruments

(1) The methods and assumptions applied in determining the fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Company to measure or disclose the fair values of financial assets and financial liabilities:

A. The carrying amount of cash and cash equivalents, account receivables, account payables and other current liabilities approximate their fair value due to their short maturities.

B. For financial assets and liabilities traded in an active market with standard terms and conditions, their fair value is determined based on market quotation price (including listed equity securities, beneficiary certificates, bonds and futures etc.) at the reporting date.

C. Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).

D. Fair value of debt instruments without market quotations, bank loans, bonds payable and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the GreTai Securities Market, average prices for Fixed Rate Commercial Paper published by Reuters and credit risk, etc.)

E. The fair value of derivatives which are not options and without market quotations, is determined based on the counterparty prices or discounted cash flow analysis using interest rate yield curve for the contract period. Fair value of option-based derivative financial instruments is obtained using on the counterparty prices or appropriate option pricing model (for example, Black-Scholes model) or other valuation method (for example, Monte Carlo Simulation).

(2) Fair value of financial instruments measured at amortized cost

The carrying amounts of the Company's financial assets and financial liabilities measured at amortized cost approximate their fair values.

(3) Fair value measurement hierarchy for financial instruments

Please refer to Note 12.8 for fair value measurement hierarchy for financial instruments of the Company.

8. Fair value measurement hierarchy

(1) Fair value measurement hierarchy

All asset and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

(2) Fair value measurement hierarchy

The Company does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Company’s assets and liabilities measured at fair value on a recurring basis is as follows:

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

As at 31 December 2022:

	Level 1	Level 2	Level 3	Total
Financial assets at fair value:				
Financial assets at fair value through profit or loss				
Funds	$3,081	$ -	$ -	$3,081
Redeemable bonds	-	540	-	540

As at 31 December 2021: None.

Transfers between Level 1 and Level 2 during the period

During the years ended 31 December 2022 and 2021, there were no transfers between Level 1 and Level 2 fair value measurements.

Movements of fair value measurements in Level 3 of the fair value hierarchy

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the period is as follows:

As at 31 December 2022: None.

	Assets
	At fair value through other comprehensive income
	Stocks
As at 1 January 2021	$16,014
Disposal for the year ended 31 December 2021	(23,948)
Total gains (losses) recognized for the year ended 31 December 2021:	
Amount recognized in OCI (presented in "Unrealized gains (losses) from equity instruments investments measured at fair value through other comprehensive income)	7,934
As at 31 December 2021	$ -

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Information on significant unobservable inputs to valuation

Description of significant unobservable inputs to valuation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy is as follows:

For the years ended 31 December 2022 and 2021: None.

Valuation process used for fair value measurements categorized within Level 3 of the fair value hierarchy

The Company's Finance Department is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The Department analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies at each reporting date.

(3) Fair value measurement hierarchy not measured at fair value but for which the fair value is disclosed

None.

9. Significant assets and liabilities denominated in foreign currencies

Information regarding the significant assets and liabilities denominated in foreign currencies is listed below:

	As at 31 December 2022		
	Foreign currencies	Foreign exchange rate	NTD
Financial assets			
Monetary items			
USD	$19,051	30.7000	$584,852
RMB	115,918	4.4090	511,081

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

	As at 31 December 2022		
	Foreign currencies	Foreign exchange rate	NTD
Financial liabilities			
Monetary items			
USD	$2,623	30.7000	$80,521
RMB	1,476	4.4090	6,507

	As at 31 December 2021		
	Foreign currencies	Foreign exchange rate	NTD
Financial assets			
Monetary items			
USD	$11,628	27.6700	$321,753
RMB	51,147	4.3450	222,232
Financial liabilities			
Monetary items			
USD	$2,148	27.6700	$59,436
RMB	2,696	4.345	11,714

Due to the variety of the Company's functional currencies, disclosure of information on exchange gains and losses on monetary financial assets and financial liabilities by significant impact foreign currency would not be possible. The Company recognized gains (losses) on foreign currency exchange of NT$35,557 thousand and NT$(13,348) thousand for the years ended 31 December 2022 and 2021, respectively.

10. Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)
